# PHP Local Filesystem Explorer
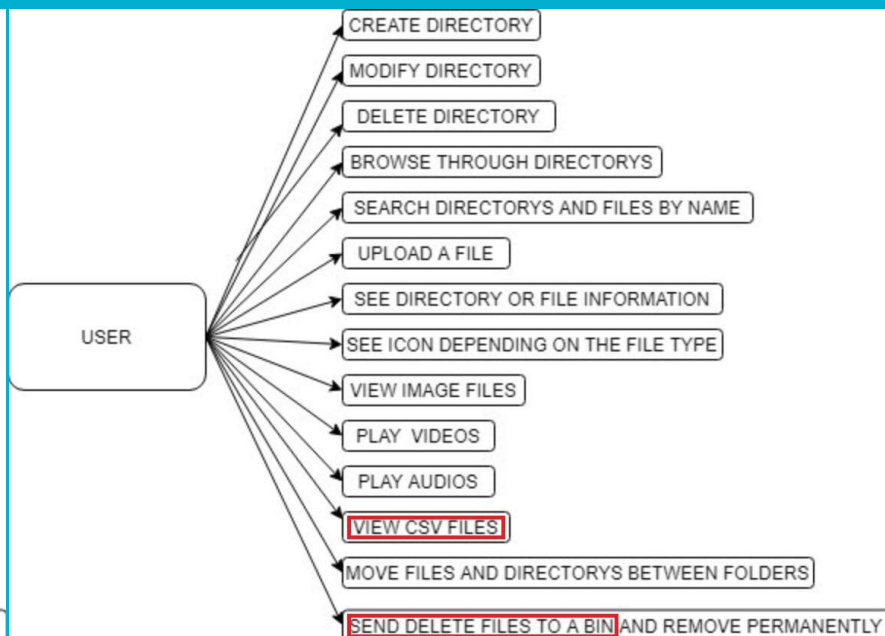

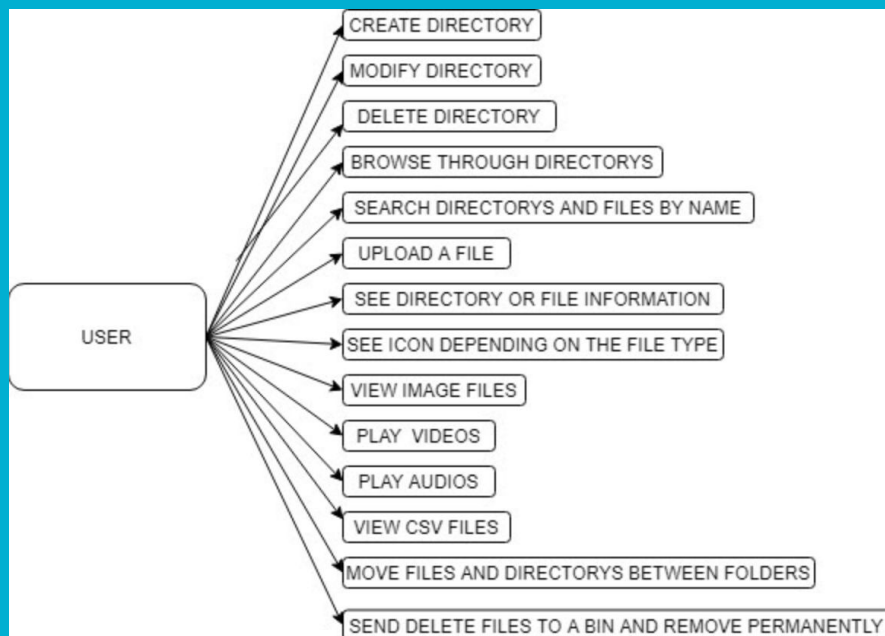

—

Victor Greco, Raúl Cátedra

Wireframe comparison

Case of use diagram comparison

Learned Lessons

○ Use and practice of PHP server and client side.

○ Interaction between different views in PHP starting from the same file.

○ Coexistence and casuistry of use between PHP and JavaScript.

○ Application of a model view controller from scrap.

○ Implementation of a FLUX architecture.

○ Interaction between various PHP files and dependencies.

○ File manipulation with PHP.

○ HTTP requests with PHP on the server side and JavaScript on the client side.

○ Asynchronous management of a team.

Problems we have

___

○ When trying to implement a "Trash" folder to permanently delete the files we have not had enough time to develop it.

○ Due to lack of time, we have not been able to preview the CSV files.

Organization during the project
